

## Service Scheduler Plus+

Get the right tech to the job in the most optimized way possible. Your GPS cannot replace this! Start saving money and creating more time by adding **Service Scheduler Plus** to your AutomatedService Sage 100 system.

**Decrease  
Windshield Time**

**Reduce  
Fuel Costs**

**Increase  
Productivity**

## Click here to calculate your ROI

Take all the guesswork out of dispatching by completely automating the tech selection process

Open slot technology auto-calculates list of techs starting with the best option

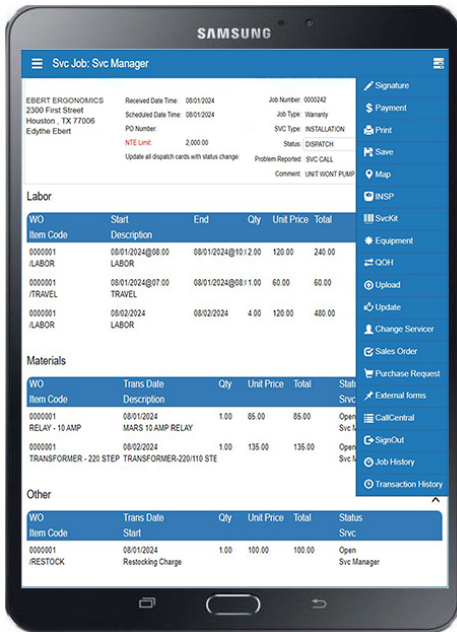

Calculations account for service tech days off, job proximity, and skill set

## OSP Mobile

**OSP Mobile** is a web based mobile service workforce solution. It will empower your most important assets to transact their service work completely paperlessly while having access to real-time customer service history, equipment, and inventories. It now also gives you the ability to process **sales orders** and **job costing** with our new integrations!

### NEW Sales Order Integration

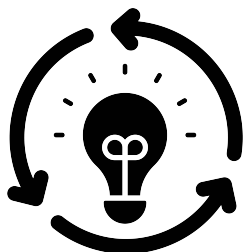

Provide your techs the sales order line detail to view, edit and automatically generate job transactions.

### NEW Job Costing Integration

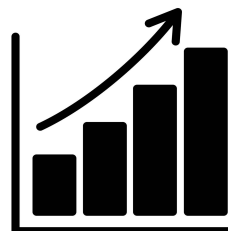

All transactions can be created in OSP Mobile solution and merged into the appropriate AutomatedService or Job Cost jobs.

On average, 5 hours a day are spent inputting orders from paper tickets and making calls from the field to the office to relay information. At \$15 an hour; that's \$75 a day, \$375 a week, \$1500 a month, and \$18,000 a year! Going completely paperless by implementing OSP Mobile can help you keep that money in your pocket.

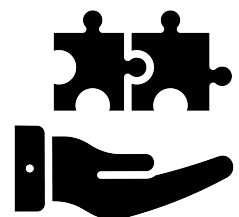

## Optimizing Your Operations with One Solution

**Streamline Operations**

**Increase Profit**

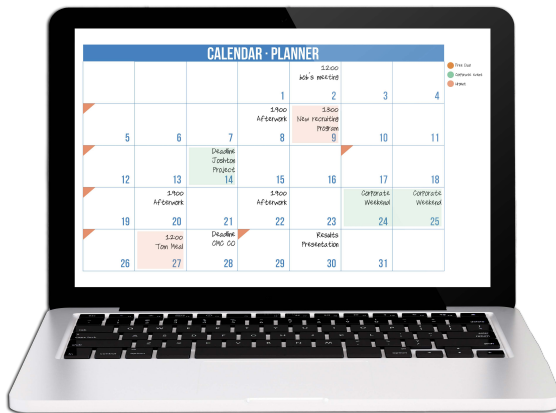

**Business Optimization**

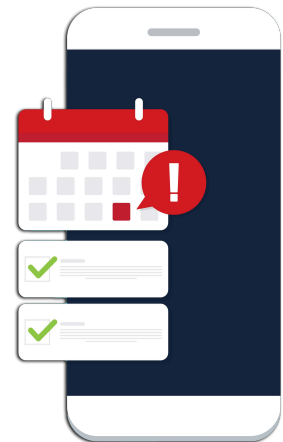

## AutomatedService Google Project Calendar

The **AutomatedService Google Project Calendar** is a company wide Google calendar that you will have access to in the office and on the go. You won't miss another project, due date, or job again with automatic alerts sent to everyone who is scheduled. Whether it's 6 days away or 6 weeks away, this feature will give you the ability to manage each job proficiently while supporting your AutomatedService dispatching one logistics tool.
